Professional Summary

I'm a full-stack software developer, primarily working on front-end/mobile development with some server-side development. I have been always an outstanding individual contributor to fast-growing teams and passionate about building a meaningful product that improves the quality of users' life through my work.

Skilled in JavaScript/TypeScript, ReactJS, React Native, HTML/CSS, Java(Spring boot) etc.

Skills

- Modern front-end development (React, Redux, HTML/CSS)
- Hybrid mobile development technology (React Native)
- Unit/Integration testing (jest, React-testing-library, Junit, etc.)
- Backend development (Node.js, Java)
- Cloud computing platforms(AWS)
- Software architecture design
- Other development tools: SQL, Docker, Firebase etc.

Work Experience

Software Development Engineer Apr 2021 - current

Generac Power Systems

Vancouver, BC

As a software developer, primary developing an app that allows a user to monitor his/her energy consumption and bill estimation.

- Implement the app's features from software design to the shipment including both server-side and client-side
- Add new APIs to the server and maintain existing ones
- Led the team to add tests to the project and reduced the rate of bug report

tools: Typescript, React Native, Redux(saga), React-native-testing-library, Jest, Java, Maven, Spring boot, MySQL, AWS, etc.

Software Developer Oct 2019 - current

Sherwa Online Services

Vancouver, BC

Developing an app that is focused on helping gamers to match up and interact with each other outside of the games' native platform

- Worked closely with the designer team to implement the app's UI/UX from scratch

- Helped the back-end team by adding APIs modifying DB
- Implemented third-party logins by integrating their API
- Created some unit tests to ensure the product's stability

Tools: Typescript, React Native, Redux(thunk), Jest, Node.js, PostgreSQL, etc.

Mobile/Front-end Developer internship Jan 2019 – Aug 2019

Vimple

Vancouver, BC

Developed an app called Base that is a chat application that is specifically for students.

- Developed an app for students in Vancouver on both web and mobile using React/React-native.
- Learned how development works in the real environment and real product.

Tools: Typescript, React Native, React, Mobx, etc.

Education

Cornerstone International Community College of Canada

- Learned basic algorithms and data structure
- Made several small apps with a few students to learn the basics of iOS and Android development(Swift/Java)
