Professional Summary

I'm a software engineer with 2 years of experience. I primarily work on front-end/mobile development using React/React-Native. However, I also have experience in backend development with Node.js and PostgreSQL. I'm an outstanding individual contributor and passionate about building a beautiful product that improves the quality of users' life through teamwork. Skilled in JavaScript/TypeScript, ReactJS, React Native, HTML/CSS, PostgreSQL.

Skills

- Modern front-end development (React, Redux, HTML/CSS)
- Cross-platform technology (React Native)
- Unit testing (jest)

- Backend development (Node.js)
- Software architecture design
- SQL, VSCode, Docker, Firebase

Work Experience

Software Developer Oct 2019 - current

Sherwa Online Services   Vancouver, BC

Developing an app that is focused on helping gamers to match up and interact with each other outside of the games' native platform

- Worked closely with the designer team to implement the app's UI/UX from scratch
- Helped the back-end team by adding APIs modifying DB
- Implemented third-party logins by integrating their API
- Created some unit-tests to ensure the product's stability

Mobile/Front-end Developer internship Jan 2019 – Aug 2019

Vimple   Vancouver, BC

Developed an app called Base that is a chat application that is specifically for students.

- Developed an app for students in Vancouver on both web and mobile using React/React-native.
- Learned how development works in the real environment and real product.

Education

Cornerstone International Community College of Canada
- Learnt basic algorithms and data structure
- Made several small apps with a few students to learn the basics of iOS and Android development(Swift/Java)
